

Parent and Community Trainings

Individually tailored with a focus on education, strategies and support

SENSORY - BEHAVIOR - TRAUMA - RELATIONSHIP - FAMILY - AUTISM - ROUTINES

Children's Therapy Network is a private clinic located in Madison, WI. We provide innovative, family focused and integrative treatment for children and their families through a unique combination of mental health, occupational therapy and speech therapy services. Even though parents often come to us for their child to start therapy for a specific concern, we believe that each person in the family system is a key player in supporting effective change. Therefore, we strive to understand the sensory, emotional and relational patterns of not only the child, but also the parents in order to effect change in a systemic way. Through this treatment philosophy, not only are children able to make functional change, but the parent-child relationship is strengthened, creating skills and resiliency that the family can use life-long.

We understand that for a variety of reasons, including travel and funding, families are often not able to access our unique model of treatment.

For this reason, we are bringing it to you!

Our trainings are designed to take the best of our treatment model and provide it to parents and the community via our individualized learning sessions.

Who: Parent Groups, Daycares, Schools, Community Groups, Providers, Support Groups, etc.

Where: We come to you!

Length: We individualize each training for the specific group. We can offer trainings between 2 hours and a full day of length.

Fees: \$150/hour. For travel outside of the Madison area, please contact us for travel expenses.

We provide trainings with the following topic areas:

Perspectives on parenting through a sensory and attachment lens

Sensory strategies for the adult and child

Mealtimes and picky eating

Behavior challenges

Home or school routines

Emotional development through the parent/child relationship

The fight/flight/fear cycle following trauma

Sensory, emotional and relational support for children with autism
